FULL-STACK WEB DEVELOPER

Beginner web developer with the ability to build web apps through the entire process. I am a fast learner with previous international experience as a lightning and sound technician prior to moving to web development. My passions lie in cybersecurity and mobile. I am looking for a part-time position as LAMP developer in which I can solve real world problems in a team. My strengths are I am always direct in communicating as well as proactive in looking for solutions. One area in which I could improve is my English communication and writing skills. In a team I need people to review my text for spelling mistakes.

TECHNICAL TOOLBOX

Front-End Development: HTML5, CSS3, jQuery

Languages: Javascript, PHP

Databases: SQL(MySQL, SQL Server)

Version Control: Git, Github   **Servers:** Apache

Frameworks: Bootstrap, Materialize, CodeIgniter

Methodology: OOP - Object Oriented Programming

PRACTICAL EXPERIENCE

Restart Network | Rotterdam, The Netherlands (9/2016 – present)

Web Development Student & Teaching Assistant

Completed an intensive 3 month web development bootcamp in December, working more than 1000 hours and graduating successfully. After graduating, I started as a Teaching Assistant and my responsibilities included assisting new students through hosting algorithm classes, live coding as well as pair programming sessions.

Projects:

- **Holland Decoded** – Developed portfolio website of a client's freelance translator business as my graduation project. Created custom admin control room to add, modify or delete existing content for users without coding skills. *Technologies used include: SQL, HTML5, CSS3, Javascript. PHP, jQuery, Bootstrap*

- **Anas Alrez** – Developed my own portfolio website. *Technologies used include: SQL, HTML5, CSS3, Javascript, PHP, jQuery, Bootstrap*

Prolites | Beirut, Lebanon (11/2011 – 12/2013)

Sound, Light & Video Installations

I worked to install lighting and sound effects for nightclubs and theaters.
